## AWCO (AMSTERDAM WATCH COMPANY)

Cartier Tank, Ref. 96019

There is much to say about the iconic Cartier Tank. So much history to describe. So much to tell about the design...

Among all the timepieces created in the 20th century, the Tank, designed by master jeweler Louis Cartier, is one of the most timeless. Inspired by the design of the Renault tank FT-17, the watch was introduced to the public around 1920.

This beautiful example of the Cartier Tank is crafted in 18k yellow gold and features a hand-wound movement, caliber 21. What makes it truly unique is that it is Paris-signed, adding extra rarity and historical significance. The size is very comfortable for both men and women.

Additionally, this watch comes with service papers, ensuring it has been well-maintained and cared for, preserving its legacy and functionality for years to come.
